

Resources for Success

Tools Used

- [AFLEET](#)
(Gwinnett County)
(Savannah) using to improve fleet replacement schedule
- Workshop series for small businesses (Goal of online Sustainability business toolkit)
- [DRVE](#) (Savannah)
- [EDF's Climate Corps Fellow](#) (Savannah)
- GIS-(Savannah)
Show public charging locations
Internally analyze ([SAGIS](#))
- [Eldapro.com](#) site configurator auto creates electrical drawings (Atlanta)
- [GEOTAB](#) (Atlanta) telematics
- [AFDC Station Locator](#) (Clean Cities)
- [Georgia Drives](#) new EV registration info
- [Energy Direct](#) (DeKalb county) Michael Rushin
- [Cherry Street Energy](#)-(Savannah) Tariff analysis in facilities with solar to maximize savings

Needs Identified/Pain Points

- Lack of centralized software for fleet data
- Input from other departments and supporting leadership in fleets (ie pushback)
- Info about trends/market shifts post EV tax credits (Gwinnett County)
- Competing priorities between fleet and sustainability departments
- Centralized info about best use cases for tech. Staying on top of new tech solutions. (What works, what might not be)
- Internal concerns about range, fire safety (from EMS w/EVs)
- Chargers along evacuation routes
- Hiring/finding good talent that is admin proof
- Centralized system in communication network
- Electric buses for school system
- Understanding EV charging ratios. Difficult to do an assessment with light vs heavy-duty vehicles.
