

HOST AN ELECTRIC VEHICLE RIDE AND DRIVE!

WHAT WE OFFER

[Driving on Sunshine](#), a campaign of The Southern Alliance for Clean Energy (SACE), is pleased to offer electric driving experiences **free of charge** to licensed drivers 25 years and older.

We can bring up to **3 all-electric vehicles** (depending on the size of the event and staff availability) to use for test drives, which may include [a Tesla Model X, a Tesla Model 3, and a Nissan LEAF](#).

In addition to vehicles, we can bring a branded tent, flags, and table to offer Driving on Sunshine branded materials and factsheets about driving electric. [These materials can be viewed here.](#)

LIABILITY

A SACE staffer must ride in the passenger seat for each drive, and interested employees are welcome to drive or ride along. The use of mobile devices while driving is strictly prohibited.

We can provide a Certificate of Liability given enough time/notice to request it - and all drivers with a valid license are covered on our insurance for the event even without a certificate.

REGISTRATION

Before an event, we can create an Electronic Registration page (visible to the public or private depending on the event) to allow participants to pre-register. This greatly speeds up the sign-in process on the day of the event.

[Click here to view a sample registration page.](#)

WHAT WE NEED FROM YOU

- A firm date and time
- Enough committed participants to make the event a success (at least 20 people)
- Space for at least 1 to 2 vehicles, a small car trailer, and tent
- A suggested route (10-15 minute ride per person, nearby access to the highway or faster roads is preferable to stop-start city traffic)
